

NACEX optimises its “ZERO CONTACT” deliveries

Barcelona, the 20th of April 2020. In response to the emergency situation caused by COVID-19, NACEX, the Logista Group’s express parcel and documentation delivery firm, is putting new solutions in place in order to be able to carry out its activity, while at the same time guaranteeing the health and safety of its collaborators and clients.

After removing the need for clients to sign for receiving a shipment on the messenger’s mobile, by means of “ZERO CONTACT” deliveries, NACEX has optimised this delivery system by making its use easier for the client.

With this improvement, the client that is waiting for a shipment, and who receives a QR code from NACEX, has the option to save it in Passbook or Wallet. In this way, finding the QR code afterwards is made easier, essential for making the delivery, increasing the ease of use for the clients.

With this optimisation for the “ZERO CONTACT” deliveries, NACEX seeks to continue guaranteeing the safety of deliveries, while at the same time making the whole process more comfortable and convenient.

The Company

NACEX has a wide range of services available and forms part of the Logista Group, the leading distributor of products and services to local retailers in the South of Europe.

NACEX has a fleet of over 1,600 vehicles and more than 3,000 collaborators, as well as a network of 31 hubs and over 300 franchise offices in Spain, Portugal and Andorra.
